

Dear Parents,

Your 8th grade student has taken a career interest inventory named Kuder through the Achieve Texas Education and Career Planning System. The Kuder system will help your child self-assess his or her interests, skills, and work values. These results will help with further educational and career planning. The Kuder system has many features that will allow your child to plan for his or her future, explore careers, learn about college majors, and learn about financial aid options.

The Achieve Texas Education and Career Planning System is internet based and can be accessed at home or the school library at www.tbecachievetexas.org for more information. Your child has a login and password that will allow them and you to explore the website for hours. The Schindewolf counselor's website will have this site as a link for easy access.
